

**PHOTOPROTECTIVE SUNSCREEN COMPOSITIONS COMPRISING
1,3,5-TRIAZINE COMPOUNDS AND TRIESTERS OF
BENZENETRICARBOXYLIC ACIDS**

5

ABSTRACT OF THE DISCLOSURE

Photoprotective cosmetic/dermatological compositions well suited for UV-
photoprotecting the skin, lips, hair, eyelashes, eyebrows and/or nails against the
damaging effects of UV radiation comprise (i) an effective UV-screening amount
10 of at least one 1,3,5-triazine sunscreen, and (ii) an amount effective to solubilize
the totality of said at least one triazine sunscreen (i) of at least one triester of a
benzenetricarboxylic acid, formulated into (iii) a topically applicable,
cosmetically/dermatologically acceptable carrier therefor.
